Pure Copper Range for the Connoisseur...

COPPER

The Health-Line of Life

Copper has been used and cherished for around 9,000 years. Pots that are made of copper are ideal heat conductors; the material is durable, hygienic and corrosion-resistant. Above all, it is the excellent heat conductivity that makes copper a perfect base material for pots and pans. It is widely known that copper conducts heat five times better than iron and even twenty times better than stainless steel.

Storing water in a copper vessel works as a purification process. It can kill all the microorganisms like molds, fungi, algae and bacteria, present in the water that could be harmful for the body. It also helps maintain body's pH (acid-alkaline) balance.

“The disease-causing bacteria cannot survive for more than a few hours on copper surface”

AQUAWARE

Water stored in copperware is the boon of life. Purified, it helps to regulate digestion and cardiac orders-the basis of good health. Our scriptures also recommend drinking of four glasses of water stored overnight in a copper utensil every morning.

POOJA ARTICLES

Sage of yore had used the copper metal to offer their prayers to God. Even today, the authenticity of copper has the same significance for any sacred ritual. La Coppera's range of pooja articles is created to embrace the ambience of worship with divinity and so to make the oblations auspicious.
